

PICK-OMINO

REINER KNIZIA

Rules Summary

Setup 🐛

- Lay out the tiles side-by-side in ascending order.

Playing the Game 🐛

1. **Roll all available dice**
2. **Keep all the dice of one value**
 - » You cannot select a value of dice that you have already set aside.
 - » If you cannot take a set of dice, you have **failed** to take a tile and you must **stop**.
3. **Stop or roll again**
 - » If you choose to stop, you add up the value of all your dice (worms have a value of 5).
 - a) If it **equals or exceeds** the value of one of the tiles in the center AND one of your dice shows a worm, you may take that tile (or one of lesser value).
 - b) If it **equals** the value of another player's topmost tile AND one of your dice shows a worm, you may instead take that tile.
 - » Place your tile on **top** of any existing tiles in front of you.
 - » **Important:** If you have no more dice to roll and you do **not** have enough to take a tile OR you do not have dice that show a worm, you have failed to take a tile.
4. **Play passes to the next player in clockwise order**

Failing to Take a Tile

- You must return the topmost tile of your stack to the row of tiles AND you must turn over the tile in the row with the **highest** value (unless the returned tile is the highest).

Ending the Game 🐛

- The game ends when all the tiles in the center of the table have been acquired.
- The players then add up all the worms on their tiles and the player with the **most** worms wins. In case of a tie, the tied player with the **highest** value tile is the winner.

HECKMECK

EXTRA WURM

Rules Summary

Setup (In addition to base game setup)

- Place the **11** and **13** tiles to the left of the other tiles.
- Place the Specialists as follows:

Additional Rules

- **11** and **13** tiles can only be taken if rolled **exactly** and they **cannot** be stolen.
- **Specialists:**
 - You gain a specialist when you **take** a tile with a specialist on it OR if you **steal** a tile from another player who has a specialist.
 - Place your specialist back to the center on the **lowest** empty tile if you **fail** at an attempt OR if you obtain a **second** specialist (Only allowed **one** specialist at a time).
- **Canned Worm:** Counts as a worm (5 points) if it's the **only** worm in your result.
- **Sitting Hen:** If a failed attempt, you lose the hen and **not** a tile (unless you don't have any tiles). Players steal your hen instead of your tile. Prevents players from stealing your bratwurms.
- **Raven:** Gain a **bratwurm** (from supply first, then from another player if empty). Do not take the Raven. Instead, place it on the lowest empty tile in the center.
- **Weasel:** Re-roll the dice you just rolled once per turn.
- **Golden Die:** Use it as a **ninth** die.
- **Bratwurms:** Each worth 1 point at the end of the game. You gain a bratwurm when you set aside at least **two** dice that show a **1**.
